Setup Basics

Set Up a Few Basics Before You Start Using Your Kactöily App!

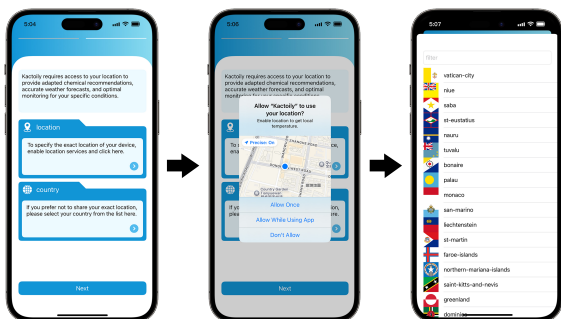

Make sure you've downloaded the app from the Google Play Store or Apple App Store.

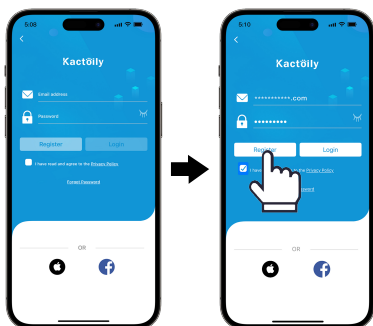

1. Open the Kactöily app to set up your account.

2. Allow Kactöily to access your wireless network and select a language to continue.

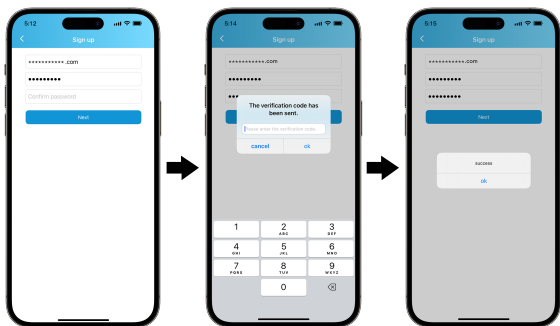

3. Allow Kactöily to access your location, and select your country.

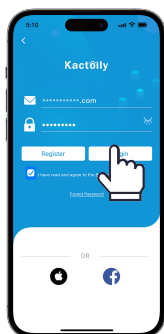

4.To log in for the first time, please register by entering a valid email address and creating a secure password.

【Your email address will be used for all future logins.】

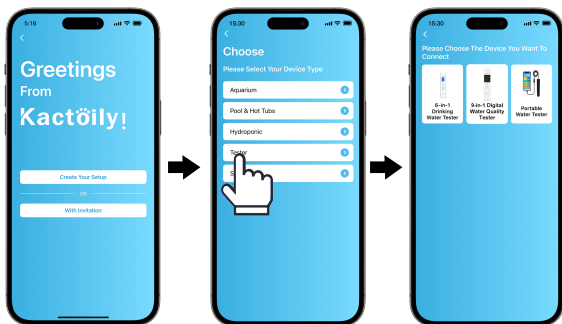

5.Re-enter your password to confirm, then enter the email verification code to finish registering.

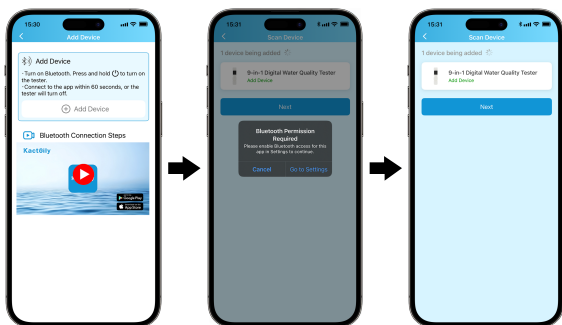

6.Once registered, enter your account and password to log in.

Bluetooth Connection

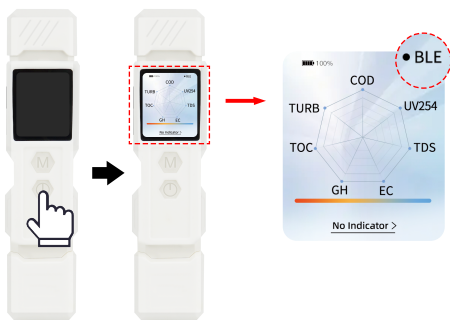

1. Please select **Tester**, then select **9-in-1 Digital Water Quality Tester**.

2. ***Please watch our Bluetooth connection video before you begin.**

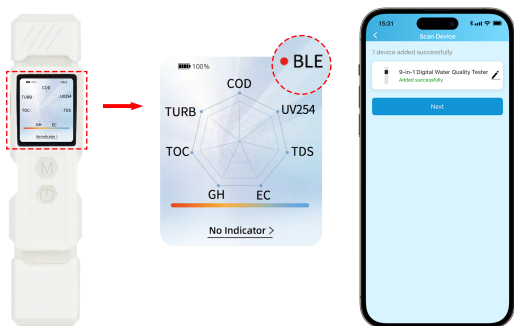

Tap the 'Add Device' button and enable Bluetooth.

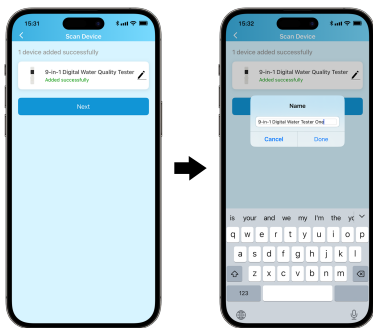

3. Press and hold the Power button to turn on

the tester. The device and the app will automatically connect via Bluetooth.

Note: When powered on, the “BLE” indicator will be black, meaning that Bluetooth is not yet connected or is still in the pairing process. The indicator will turn red once the Bluetooth connection is successful.

4. When the light in front of ‘BLU’ changes from black to red, the device is successfully connected to your phone.

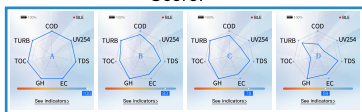

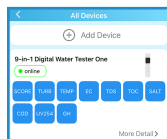

5. Connection successful. You can now name your device.

Device Status: Switch temperature units (°C/°F), view connection status, clear device data, etc.

Country: Select country.

Language: Select language.

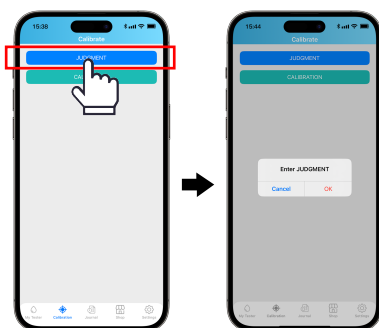

Support: FAQ & Contact Email.

Privacy Policy: View how the app collects, uses, stores, and protects users' personal information.

Sign Out: Log out of your account.

Calibration

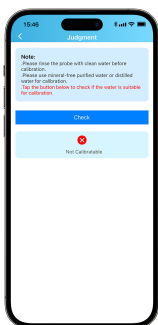

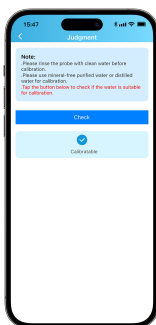

Note: Please use mineral-free purified or distilled water for calibration.

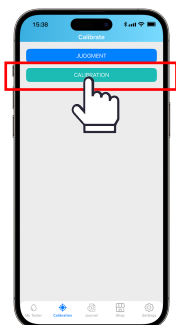

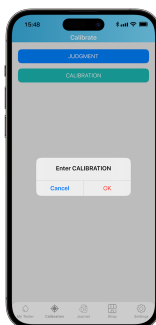

1. Before calibration, go to the Judgement page to confirm your water is suitable for calibration.

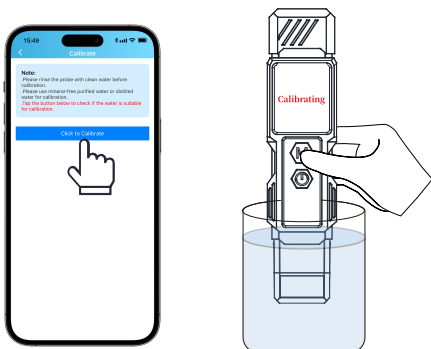

2. Insert the tester into the prepared calibration water, then tap Check to verify.

3. If the result shows “Calibratable,” the water is suitable for calibration. If it shows “Not Calibratable,” replace the water and verify again.

4. After confirming the calibration water is suitable, tap to enter the calibration page.

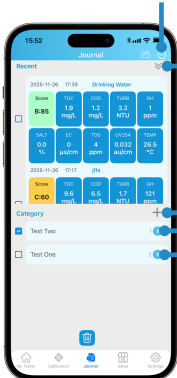

5. Insert the tester into the appropriate calibration water, then click Calibrate.

6. Once “Calibration Successful” appears, the calibration is complete. (You can also calibrate directly on the device; calibration only needs to be done once, either via the app or the device.)

Journal

Tap to toggle the checkbox.

Swipe down to view saved notes.

Tap to view the notes in this category.

Export date.
